HIP AND KNEE CARE

FOR MORE INFO VISIT: WWW.JPMCBRUNEI.COM

SURGICAL HIP AND KNEE CARE

Advanced minimally invasive procedures and joint replacement surgery performed by experienced specialist hip and knee care consultants.

Our care is tailored to manage a wide range of hip and knee conditions across all ages, with a focus on reducing pain, improving mobility, and supporting faster recovery.

NON-SURGICAL HIP & KNEE CARE

Available treatments include:

- Hyaluronic acid injections for hip and knee joints
- Advanced stem cell injection therapy (formulated in Japan)
- Ultrasound-guided injections for targeted pain relief

WHY STEM CELL THERAPY?

- Supports the body's natural repair and joint function
- May be considered for persistent joint pain when standard treatments are less effective
- Advanced Stem Cell injection therapy formulation from Japan

HIP & KNEE JOINT REPLACEMENT SURGERY

We provide hip and knee replacement surgery to relieve pain and restore movement by replacing damaged joint surfaces with prosthetic implants.

WHEN SURGERY MAY BE RECOMMENDED

For patients with severe joint damage or persistent pain, joint replacement surgery may be the most effective option to improve mobility and quality of life.

PATIENT FOCUSED CARE INCLUDES

- Minimally invasive intermuscular surgical techniques without cutting through the muscles
- Early mobilisation and structured rehabilitation
- Reduced post-operative pain
- Faster recovery support
- Comprehensive care from consultation through to recovery

MEET THE EXPERTS

DR TARO **UMEZU**

Orthopaedic Surgeon

DR KAZUKATA **SUGIMOTO**

Orthopaedic Surgeon

Our orthopaedic surgeons are highly experienced in treating a wide range of musculoskeletal conditions, with expertise in hip and knee joint replacement, regenerative medicine for joint arthritis, pain management, sports injuries, osteoporosis, and rheumatological conditions.

PATIENT EXPERIENCE

"The doctors and staff were extremely kind and made me feel much more at ease and less anxious. Even after the surgery, they were very supportive, which was very reassuring.

The facilities were excellent and even larger in scale compared to Japan. The anaesthesia was very safe, and I felt very comfortable throughout. Post-operative care from the nurses and rehabilitation team was also very good.

If you are coming to Brunei, advanced high-technology medical care is available. For those suffering from knee pain, I strongly encourage you not to delay treatment and to consider receiving care at this hospital."

— Mrs H, Patient (Stem Cell Knee treatment, Japan)
