OUR SERVICES

Comprehensive cancer care using modern drug therapies and personalised treatment plans delivered by a multidisciplinary specialist team.

We provide care across diagnosis, treatment, and ongoing follow-up support.

WHAT MEDICAL ONCOLOGY TREATS

Medical oncology focuses on cancer treatment using medications that work throughout the body.

This includes:

- Before surgery (neoadjuvant treatment)
- After surgery (adjuvant treatment)
- To control or slow cancer progression
- To improve quality of life in advanced cancer (palliative care)

TREATMENT OPTIONS AVAILABLE:

- Chemotherapy
- Targeted Therapy
- Immunotherapy
- Hormonal Therapy
- Personalised cancer treatment based on tumour profile

PERSONALISED CANCER CARE

We provide treatment plans tailored to each patient's condition.

This may include:

- Next Generation Sequencing (NGS) for Tumour genomic profiling
- Germline testing for hereditary cancer risk
- Individualised treatment selection based on clinically relevant results

MEET THE EXPERTS

PATIENT SUPPORT & CARE

Cancer treatment is not only about medication but also continuous care and support.
